

# SANITIZE WITH OXI

## FRONT LOAD WASHERS

### FEATURE

#### SANITIZE WITH OXI

The Speed Queen front load washer offers a Sanitize Cycle that works in tandem with an Oxi additive.

### ADVANTAGE

#### BETTER QUALITY

The Sanitize Cycle is programmed to wash clothing with an Oxi additive and detergent to remove 99.9% of bacteria found in home laundry applications. The cycle is approved by NSF (National Sanitation Foundation) International.

### BENEFIT

#### LONGER LIFE; PEACE OF MIND

The Oxi Cycle offers the user peace of mind as this cycle helps resist and safely remove mold and unwanted bacteria from their clothes. This cycle should be used in applications where there is concern of bacteria that needs to be removed from clothing.

### EXAMPLE

To ensure the cycle is used properly the user should add the appropriate portion of Oxi into the bottom of the tub before clothes are loaded. Clothing should then be loaded into the washer with the recommended portion of detergent. The user should also check hot water inlet for a minimum 120-degree temperature for proper results. With proper use, the Sanitize Cycle will effectively remove most bacteria from a home laundry load.
